Patient classification on admission.....	33
Sources of admission to hospital	35
Treatment speciality of consultant.....	44

Background

The UK Biobank population of 500,000 participants comprises 89% of participants recruited in England, 7% recruited in Scotland; and 4% recruited in Wales. Obtaining linked inpatient hospital data for the entire cohort has involved linking to separate providers in each of these countries. Data can vary in terms of content (quantitative and qualitative), quality, geographical and temporal coverage.

UK Biobank aims to unify all hospital records received from each data provider into a single research-ready dataset that is amenable to analysis by approved researchers. This document outlines the steps taken to map data items between England, Scotland and Wales.

Datasets

Table 1 details the datasets involved in the mapping exercise, including the data provider, temporal coverage and the clinical coding system used to code disease outcomes.

Table 1: hospital data from England, Scotland and Wales

Data provider	Dataset	Years coverage	Clinical Coding			
			ICD-9	ICD-10	OPCS-3	OPCS-4
England NHS Digital ¹	Hospital Episode Statistics (HES)	1996 - present	-	1996 - present	-	1996 - present
Scotland ISD	Scottish Morbidity Record (SMR) 1a	1981 - 1997	1981 - 1996	1996 - 1997	1981 - 1988	1989 - 1997
	Scottish Morbidity Record (SMR) 1b	1997 - present	-	1997 - present	-	1997 - present
Wales SAIL	Patient Episode Database for Wales (PEDW)	1999 - present	-	1999 - present	-	1999 - present

¹ Previously HSCIC

Source of inpatient hospital record

The source of the inpatient hospital record has been retained and is available in Data Showcase:

[40022 Inpatient record origin](#)

[41254 Episodes containing "Inpatient record origin"](#)

More detailed source information, for example indicating whether SMR data is from SMR 1A or SMR 1B is provided in the record format fields.

[41252 Episodes containing "Inpatient record format" data](#)

[41253 Inpatient record format](#)

Researchers are encouraged to request these data-fields should they wish to adjust for systematic differences in the way the data may have been collected and supplied to UK Biobank

Mapped data fields

Data fields which were standardised across England, Scotland and Wales were mapped without modification; these include clinical codes (ICD-9, ICD-10, OPCS-3 and OPCS-4), dates of admission to and discharge from hospital, and length of hospital stay in days.

Data fields which were not standardised across England, Scotland and Wales were mapped into a single field and a new UK Biobank coding system was derived (use the links in table 2 to navigate to the data-field of interest).

Table 2: Non-standardised data items mapped between England, Scotland and Wales

Description	UK Biobank ID
Destinations on discharge from hospital	41248
Intended management of patient	41244
Main speciality of consultant	41245
Methods of admission to hospital	41249
Methods of discharge from hospital	41250
Patient classification on admission	41247
Sources of admission to hospital	41251
Treatment speciality of consultant	41246

Destinations on discharge from hospital
